

ADMINISTRATIVE POLICY #6

November 13, 1985

SUBJECT: City Participation in Correcting Drainage Problems on Private Property.

Due to frequent requests for assistance in correcting and/or alleviating certain drainage problems on private single family residential property, the following policy is hereby adopted:

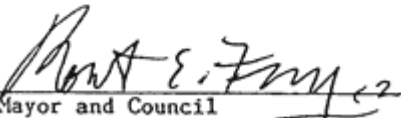

"When, the City's use of a drainage ditch, channel, or water way has created a situation requiring repairs, the City will provide work crews to perform the needed work as work schedules permit. The private property owner or owners involved shall pay for materials or one-half (1/2) the cost of the total work performed, whichever is greater. This policy shall not apply to developments or homes less than five years old."

Deviations and/or appeals from this policy shall be considered by the Mayor and Council after investigation of the request by the City Manager.

City Manager

Approved:

Mayor and Council
